

Madhubhan Resort

Wellness Destination

Madhubhan Resort is an award-winning wellness destination and at par with international standards.

A fusion of a classy traditional and sumptuous contemporary taste.

Developed with ethereal nature and a lavish ambiance in mind, Madhubhan Resort and Spa an **ideal exotic vacation and event location** for guests who prefer serenity.

Madhubhan recently decided to install AC chargers to promote ev charging ecosystem.

As a part of this Madhubhan needed Multi-output 4W chargers

for their guests as well as members.

Madhubhan and VerdeMobility first partnered in 2021

To install their first charging station. Considering the frequency of vehicles, and understanding the requirements of Madhubhan.

The best fit for their requirement was VerdeMobility's Ksipra AC basic pro charger, a 15 kW, type 2 dual gun charger that can charge 2 Evs simultaneously.

VerdeMobility has delivered a complete charging ecosystem to Madhubhan

With partner access to the dashboard, the admin team can monitor the charger remotely, and using the dedicated mobile application guests can charge their vehicles.

For resort members, we have issued RFID cards that are integrated into the CSMS dashboard, enabling an effortless charging process.

All of this is now being managed by Madhubhan team, single handedly without VerdeMobility's intervention.

Since the installation of the charger, Madhubhan has been a prime location for charging electric 4-wheelers.
