

Your partner in switching to
smarter means of mobility

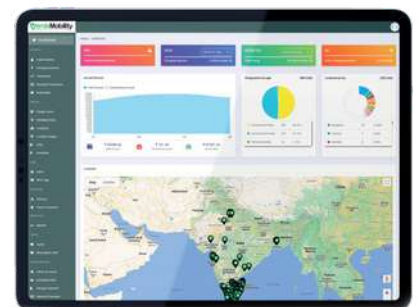

AC Chargers	Charging Capacity(kw)	Output
Compact	3.3 kW to 22 kW	  
AC 15D	15 kW to 44 kW	 
Bharat AC001	10 kW	  
Hybrid AC	14 kW	  
DC Chargers	Charging Capacity(kw)	Output
DCFC 30 kW	30 kW	 
DCFC 60 kW	60 kW	  
DCFC 120 kW	120 kW	  
DCFC 240 kW	240 kW	  
DCFC 360 kW	360 kW	  
LEVDC 12 kW	12 kW	

Charging Management Software (CMS)

The VerdeMobility CMS is an end-to-end EV charging and energy management solution. It enables the user to connect with OCPP compliant infrastructure and allows them to monitor charging data in real time data.

Features

- Real-time monitoring, maintenance, and troubleshooting of chargers.
- Detailed charge point operator reports.
- Dynamic load management capabilities.
- Partner/fleet management.
- ROI analytics.
- OCPP compliant.

AC Chargers

VerdeMobility delivers smart and reliable AC EV charging solutions designed for seamless everyday charging. Built for efficiency, safety, and connected mobility, our chargers power the future of electric transportation.

3.3 kW Compact AC Charger

A 4-wheeler EV Charger.
Available in **3.3 kW**

7.5 kW Compact AC Charger

A 4-wheeler EV Charger.
Available in **7.5 kW, 11 kW and 22 kW**

10 kW Bharat AC Charger

Our globally compliant Bharat AC001 charger offers client a suite of unique features to choose from
Available in **10 kW**

14 kW Hybrid AC Charger

Charges 2, 3, and 4 wheeler EVs Simultaneously.
Available in **14 kW**

Wall Box

Pedestal

15 kW AC Chargers

Charges two 4-wheeler EVs Simultaneously.
Available in **15 kW, 22 kW and 44 kW**

DC Chargers

VerdeMobility's DC fast chargers deliver reliable and high-speed EV charging solutions. Built for seamless, efficient, and future-ready electric mobility.

30 kW DC Charger

Engineered for efficient everyday EV charging.

60 kW Mini DC Charger

Compact and efficient DC fast charger designed for commercial, workplace, and destination charging applications.

120 kW Mini DC Charger

High-performance DC fast charger ideal for commercial locations, enabling rapid charging for passenger EVs and fleet vehicles.

240 kW Mini DC Charger

Ultra-fast DC charging solution designed for highways, fleet depots, and high-traffic charging hubs, reducing vehicle downtime significantly.

360 kW DC Charger

Next-generation high-power DC charger built for heavy-duty EVs and premium fast-charging networks, delivering maximum charging speed and operational efficiency.

LEV DC 12S

Our DC charger for E2W and E3W ensures that EV users can charge their vehicle smoothly without having safety concerns. Available in 3kW, 6kW & 12 kW

Coming Soon

Controllers

VerdeMobility charger controllers are globally compliant product that companies can use to build a variety of EV charging stations with capacities ranging from 3.3 kW to 44 kW in AC and 30 kW to 480 kW in DC. Its unique design makes it suitable for all sizes of applications that include but not limited to household and commercial charging requirements.

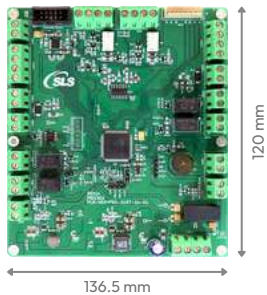

Vericon 2.0

- Triple gun/socket charger
- Solenoid locking (Optional)
- Inbuilt metering
- OCPP 1.6J
- RFID Support

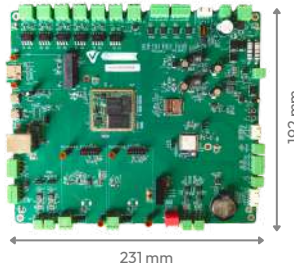

Vericon Compact

- Single Gun Charger
- Solenoid locking
- Inbuilt metering
- OCPP 1.6J (Ready for OCPP 2.1)
- RFID Support
- RS485 Support

Vericon Pro

- Dual gun/socket charger
- Solenoid locking
- External metering over RS485
- OCPP 1.6J

Vericon DC Pro

- Dual gun support
- Supports CCS2 charging protocol
- External metering over RS485
- OCPP 1.6J
- RFID Support
- PCC Board

EV Simulator

VerdeMobility's EV Simulator is a tool to test an EV Charger without connecting any electric vehicle. It validates the advanced functions of a charging station at the time of its commissioning & troubleshooting.

End-to-End EV Charging Solution Ecosystem

A complete EV charging ecosystem that seamlessly integrates hardware, software, installation, and energy management—enabling efficient, scalable, and future-ready mobility solutions.
